## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 6-8, 10, 12 and 13 were previously rejected under 35 U.S.C. 102(a) as being anticipated by Litborn et al. (W) 98/33052). This rejection remains in effect.

Please see Response to Arguments below.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 9 and 11 were previously rejected under 35 U.S.C. 103(a) as being unpatentable over Litborn et al. (WO 98/33052) in view of Mian et al. (6,319,469). This rejection is also upheld. Please see Response to Arguments below.

### ***Response to Arguments***

5. Applicant's arguments filed 1/26/2004 have been fully considered but they are not persuasive. In traversing the Examiner's previous arguments, applicant has amended the claims to include reactants in the added microvolume of solvent and then argued that this feature is enough to overcome the prior art cited. The Examiner respectfully disagrees. On page 9, lines 27-30, Litborn clearly states that "it can also be of value to include ***one or more of the reactants to be used in the operation in said covering liquid*** to feed the same, even sequentially, to the reaction". The Examiner believes this is a clear teaching of having the reactants in the microvolume of added solvent since the covering liquid is a solvent. Litborn also teaches the extraction of components from the sample into the solvent as well. Therefore, the claims remain rejected.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
